

PARTIAL OPENING CHECKLIST AND RECOMMENDATIONS

Ensure there is the usual calm and supportive environment in school to reduce any anxiety felt by these vulnerable children. Empower the children of key workers to make them feel good about the role their parents are playing.

Promote hand hygiene and respiratory etiquette

- All children and staff to wash their hands on entry to school and at key times during the day

- Provided tissues for coughs and sneezes - tissues binned (+coughing/sneezing into bend of elbow)

Reduce crowding

- If large numbers of children are expected, plan to split into smaller groups to allow for adequate spacing

Ventilate rooms

- Open classroom windows and doors to allow a flow of air through the room

Isolation facilities

- Plan to have a space available to isolate any children that develop signs of flu until they are picked up

End of day cleaning routines

- Ventilate the building by opening exterior doors as far as is reasonably possible

- Wipe surfaces/handles/keyboards in rooms that have been used
